📊 Dashboard Analysis: Online Retail Sales

📌 Overview

This dashboard provides a complete view of online retail sales performance by combining multiple key metrics such as revenue, quantity, and regional performance. It helps in understanding business trends and making data-driven decisions.

🎯 Purpose of Dashboard

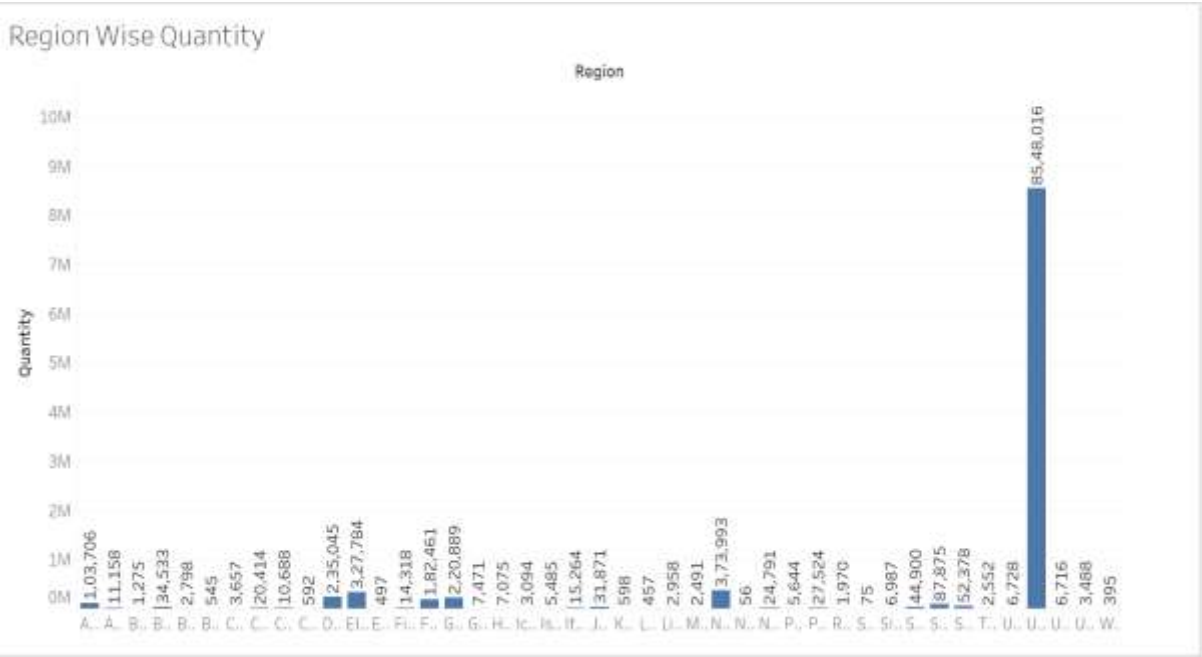
The main purpose of this dashboard is to:

- Track overall sales performance
- Analyse monthly trends in revenue and quantity
- Compare sales across different regions
- Identify high-performing periods and locations

🔹 1. Region Wise Quantity

This section compares product sales across different regions.
It helps to:

- Identify top-performing regions
- Understand geographic demand



2. Month Wise Quantity

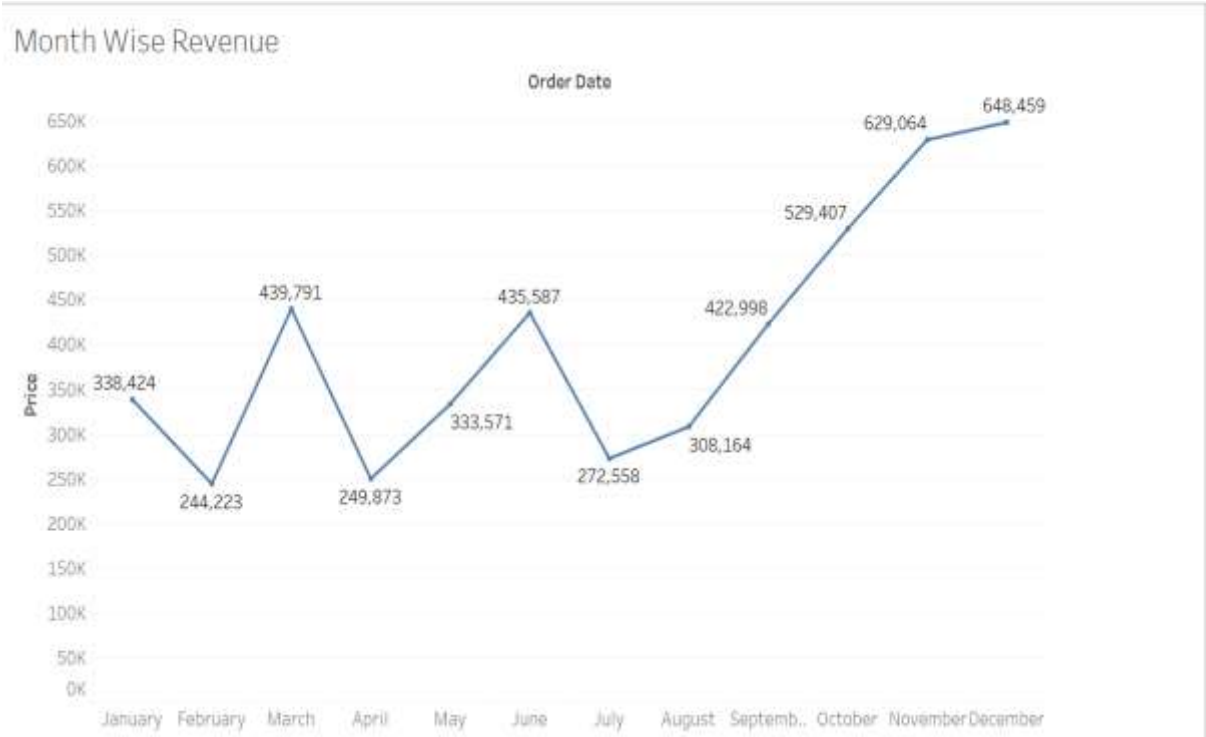
This part displays the total number of products sold per month.
It helps in:

- Understanding customer demand
- Identifying high-sales periods

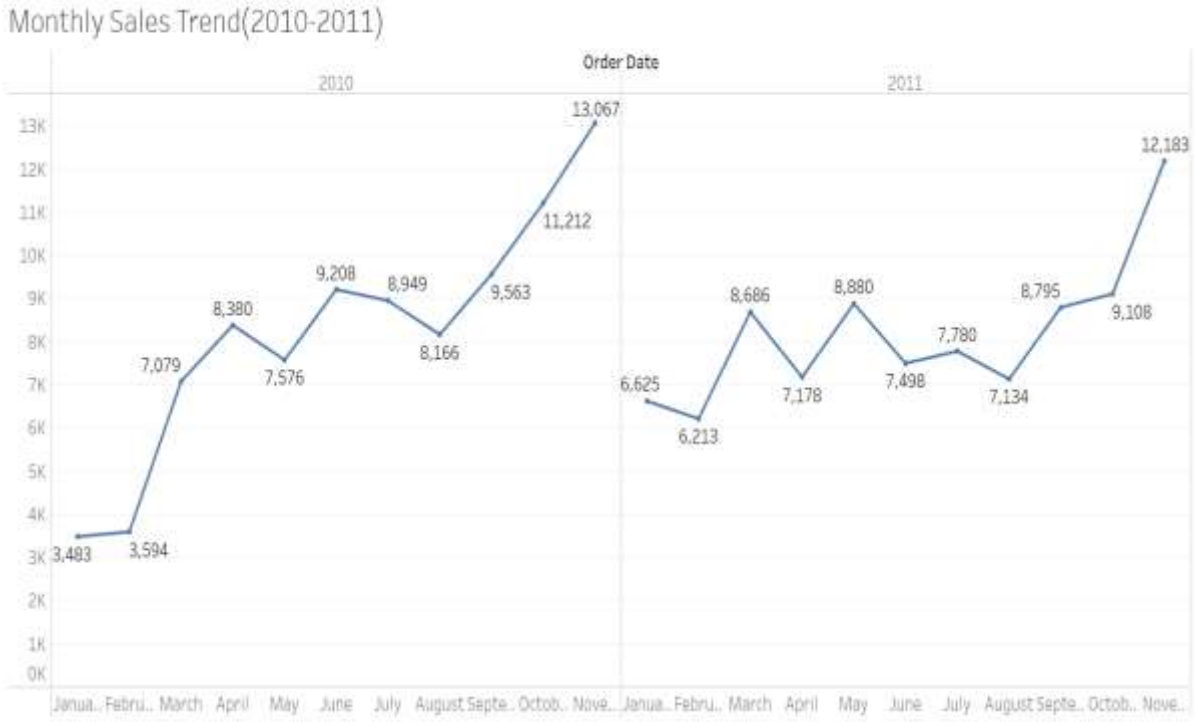
3. Month Wise Revenue

This section shows the total revenue generated each month.
It helps identify:

- Peak sales months
- Seasonal trends
- Business growth over time



- **Monthly Sales Trend (2010–2011)**

This chart shows the total sales quantity for each month in 2010 and 2011.
It helps in:


- Understanding monthly sales performance
- Comparing sales between two years
- Identifying peak and low sales months
